Dário Costa
Web Designer

Hello

My name is Dário Costa, i'm 29 years old and I live in Montijo, a small city near Lisbon. I'm a Web and Graphic Designer who likes to code and this is my small story. After entering college to get a degree in Computer Engineering, I realized that it was the wrong path for me. So I decided to follow my dream of drawing and design. After some time of study and practice I managed to get an intern job at kriação.pt. This was back in 2008 and, ever since then, my life has changed.

After working with successful companies like Premium Minds, I'm currently a Full Time Freelance Designer, helping clients all over the world with their web and print advertisement.
